PRESS RELEASE – SPS 2026

Altus Highlights Cutting-Edge Industrial Automation Solutions and Nexto XF Modular I/O Innovations at SPS 2026 in Nuremberg

NUREMBERG, GERMANY — Altus Sistemas de Automação is proud to announce its participation in SPS (Smart Production Solutions) 2026, one of the world's premier trade fairs for smart and digital automation, held in Nuremberg. Reaffirming its commitment to innovation and high-performance industrial control, Altus returns to this milestone event in close collaboration with its strategic technology partner, CODESYS.

This year's edition marks another major highlight in Altus' global presence, bringing state-of-the-art Programmable Logic Controllers (PLCs), edge automation tools, and expanded I/O capabilities to international system integrators and OEMs.

Key Highlights at the Altus Booth:

- Nexto XF Series & Brand-New Modular I/O: Representing Altus' most significant recent product release, the Nexto XF series takes center stage with the introduction of its all-new modular I/O modules. Engineered for advanced edge automation, the Nexto XF series empowers industrial applications through native Docker container support, enabling seamless deployment of modern software architectures and edge intelligence alongside real-time control.
- Nexto NX Series High-Performance CPUs: Altus will showcase the powerful NX3008 and NX3035 CPUs. Designed for complex process automation, critical redundancy applications, and data-intensive industrial environments, these controllers deliver robust processing capacity and rich connectivity options.
- Nexto Xpress Compact PLCs: Designed for quick deployment and high efficiency, the Nexto Xpress line offers integrated I/O, IoT capabilities, and embedded CODESYS runtime in a compact form factor—ideal for standalone machinery, decentralized nodes, and smart infrastructure.

Excitement and Partnership with CODESYS

"SPS Nuremberg is consistently one of the most vital platforms for our company to showcase software-driven hardware engineering," said the Altus International Sales Team. "We are extremely excited to join forces once again with our partner, CODESYS, at this year's show.

Together, we continue to deliver flexible, powerful, and future-proof automation technology that drives digital transformation for our global customers."

Altus invites trade show visitors, partners, and media representatives to visit the booth during SPS 2026 to discover live demonstrations, experience the new Nexto XF modular I/O capabilities, and discuss tailored control solutions for smart manufacturing.

About Altus Automation

Altus is a leading developer and manufacturer of industrial automation systems, high-availability PLCs, and edge devices. For over four decades, Altus has provided reliable control solutions across diverse sectors including energy, oil & gas, water management, infrastructure, and smart manufacturing worldwide.
